

Conference: *Contagion, Information, Territory*

NEW SUBMISSION DEADLINE February 15, 2026

Leiden University, 17-19 June 2026

Keynote speakers:

Dr. Ramon Amaro (Design Academy Eindhoven)

Prof. Dr. Jasbir Puar (University of British Columbia)

As new forms of exclusion and colonialism are emerging and old apartheid policies reinvigorated, the movement of people, the spread of disease, and the circulation of information become ever more central to our understanding of war, politics, identity, and government. The war in Gaza and illegal occupation in the West Bank are a case in point. This conflict is not just territorial, it is informational, and the Israeli government employs strategies of withholding care and barring humanitarian aid to preemptively immunize Israel's cultural and legal self-perception as a 'uniquely' Jewish nation-state, against Palestinian life. As the international movement of trans* and queer people is restricted in ways that bring to mind the late 20th century response to the HIV/AIDS crisis, gender and sex education are thought of as 'infecting' children with particular sexual preferences, or encouraging trans* identification in them. Meanwhile, the language of contagion is activated politically and by opposing factions. Where some speak of a "woke mind virus," others attempt to make sense of fascist protests like the January 6th attack on the Capitol in 2020, or the 2025 extreme rightwing riots in The Hague, the Netherlands, as fueled by viral online discourse and contagious hatred of immigrants.

In response to these concerns, contagion, information, and territory emerge as central concepts of political analysis and critical thought. Contemporary artists and writers like Isadora Neves Marques, Tabita Rezaire, Michel Nieva, and Anne Boyer reflect on these convergences in their practice, and academic consideration of such work may help theorize them further. It is for this reason that we call for papers that seek to map the connections between contagion, information, and territory through critical analyses of cultural objects.

How do public health interventions, immunization policies, and biopolitical regimes help govern populations under conditions of uncertainty? Concepts of (auto-)immunity, and parasitism, have been central to discussions around biomedicine, territory, and democracy, and considerations of care, the viral, and vaccination have found new urgency during the COVID-19 pandemic (Cohen 2009; Esposito 2008; Serres 1982; Derrida 2004; Di Cesare 2021; Povinelli 2016). Angela Mitropoulos helps us wonder how insurance, contracts, and risk-prediction have historically structured vulnerability and precarity along lines of gender, race, and capital (Mitropoulos 2012). Jasbir Puar has mobilized the notion of "debility" to critically examine discourses around a variety of crises, urging us to focus on the endemic nature of state sanctioned "debilitation" as part of biopolitical regimes of power and in the context of Palestinian rights (Puar 2017).

For this conference, we are particularly interested in scholarship that brings these concerns into dialogue with contemporary technological and political realities (Pasquinelli 2023; Amoore

DEADLINE EXTENSION

2013; Parisi 2013). How do data infrastructures and algorithmic systems (re)produce social hierarchies and how do they relate to what Ramon Amaro refers to as “the black technical object” (Amaro 2023)? How can bio- and necropolitical configurations around human embodiment, along with their relationship to disease, harm, and contagion, be theorized in connection to processes of territoriality and critical analyses of datafication in this “techno-libertarian age” (Mbembe 2021)? How does the transformation of European borders into “deathscapes” rely on a logic of securitization and immunization supported by digital infrastructures of control and racialized surveillance (Pugliese 2022; Stümer 2018; Browne 2015)?

In conversation with cybernetics, Sylvia Wynter reminds us that the Foucauldian framework around security requires further elaboration to confront how the category of “Man” has historically depended on racialized life and the enduring histories of plantation economy, colonialism, and chattel slavery (Wynter 2003 & 2018; Foucault 2007; Tsing 2021). Articulations of territory, anxieties around health, cleanliness and contagion, and regimes of information and datafication intersect, and give rise to an assemblage in which differentially racialized, gendered, classified, and categorized human and non-human figures emerge (Weheliye 2014; Gossett & Hayward 2020). **In response to this assemblage that exists at the center of contemporary political, cultural, and social subjection and abjection, we invite paper proposals reflecting on the relationship between contagion, information, and territoriality.**

Responses might encompass, but are not limited to:

<ul style="list-style-type: none">- Metaphors of disease in relation to data and territoriality.- Neoliberal governmentality, borders, and racialized data.- Technologies and models of preemption, prediction, and inoculation.- Necropolitics, data, and immunity in its territorial and biomedical inflections.- Cultural imaginaries and histories of technologized futures and territories.- Debility and debilitation as endemic biopolitical strategies.	<ul style="list-style-type: none">- War, occupation, and apartheid in relation to information, territory, and contagion.- Insurance, financialized capital, and techno-libertarianism.- Infection and contagion in relation to BIPOC, queer, and trans* stigmatization and movement.- Biosecurity, border regimes, and the management of virality (HIV/AIDS, bird flu, BSE, Zika, etc.).
--	---

We welcome submissions on these themes across fields and disciplines. Please submit abstracts for 20-minute presentations of 250 to 300 words, along with brief biographical notes (about 50 words) to contagious.territories@hum.leidenuniv.nl **by January 31, 2026 by February 15, 2026**. We especially encourage queer, BIPOC, disabled, working class, and other marginalized scholars to apply. Notifications of acceptance will be sent by **February 28, 2026**. Please note that attendance at this conference will be **in-person ONLY**. For more information, please contact us at contagious.territories@hum.leidenuniv.nl. For updates visit www.contagiousteritories.org.
